

Data Imports

Help! I imported last year's data / the wrong class file.

The easiest fix is to delete all classes and re-import the correct file:

1. Go to **Class Editor** and check "**Show Only Classes**" (far right-hand side).
2. Select your first class, then **Shift+click** your last class to highlight all classes.
3. Click **Delete Selected Classes**.
4. Import the correct class file.
