

Links

Which link should I give to my parents? The scheduling link for the account or the scheduling link for the selected event?

If you only have one open event on your account, you can give your parents the scheduling link for your account. This URL is located on the [Global Setup / Business](#) page under the Account URL. This link will display any OPEN event on your account to your parents. This means if you have multiple open events, parents will see a pull-down where they can select an event.

You can customize the URL by checking the box "custom URL" and entering in what you would like the **XXX** part to be in the <https://pickatime.com/XXX> URL. For example, if you would like your URL to be <https://pickatime.com/myschool> you would check the box "set custom URL" and enter in myschool in the white box. Note that it will take approximately 5-10 minutes for the new URL to be available.

IMPORTANT NOTE: The event URL will take the customer directly to the event. However, if you have any other open events on your account, the event table will be displayed to the parent, and they will be able to toggle to the other events. You can use the **Category Option** if you want to direct a parent to a certain event without an option to toggle to the other opened event on the account.
